

ORAT S.r.l. is a national and international reference point in the non-destructive testing sector. Since 2005 it has introduced in Italy the technology of Automatic Ultrasounds for the control of pipeline weldings and, since then, it is the undisputed leader in the sector.

The know-how embraces the most important non-destructive control methodologies: from manual to automatic ultrasounds, from X-rays through X-ray tubes and gamma sources, to magnetoscopic investigations up to penetrating liquids.

The strength of ORAT in the pipeline sector is based on the professionalism and availability of the nearly one hundred technicians, all ISO 9712 qualified, as well as on high performance and highly reliable equipment.

Since 2016, ORAT has been an Inspection Body thanks to obtaining accreditation in accordance with UNI CEI EN ISO / IEC 17020. Our Quality System has thus achieved the highest recognition obtainable in the sector.

PRINCIPLES

The principles adopted by ORAT as a reference for the management of the Environment and Safety aspects of its activity concern:

- compliance with the laws and regulations in force
- the implementation of good practices for environmental protection and safety that must also be followed by its suppliers;
- the promotion of employee participation in the process of risk prevention, protection of health and safety with regard to themselves, their colleagues and third parties, including those relating to the environment
- satisfaction of stakeholder expectations as a fundamental prerequisite for creating value and promoting sustainable development.
- the commitment to reducing the environmental impact of the company's activities, contributing to the mitigation of climate change through the adoption of sustainable practices and the efficient use of resources.

COMMITMENTS

ORAT undertakes to transform the principles into actions:

- promoting the application of the Integrated Management System for the Environment and Safety in line with international standards;
- respecting the legislation on the environment and safety and on company procedures and work orders, reducing the risk to which their workers are subjected in order to prevent accidents and occupational diseases;
- guaranteeing continuous training and awareness of its management and all personnel on safety and environmental issues;
- constantly keeping watch on compliance with the defined rules, ensuring that employees and staff of external companies operate in compliance with environmental, health and safety and the proper use of resources;

- preventing all possible emergency situations that may occur and preparing to respond to such emergencies;
- using qualified suppliers for safety and environmental aspects, raising awareness of occupational health and safety issues with a view to continuous improvement;
- building a relationship with customers of mutual trust, offering high value-added services and ensuring the reliability of inspection services;
- activating an open dialogue with the Authorities and the Communities and collaborating with the Institutions, guaranteeing the maximum correctness and transparency in the relationships and providing
- optimising the resources used, adopting the best available techniques and promoting the use of renewable sources in order to reduce environmental impacts;
- promoting energy efficiency and the use of technologies with low environmental impact to combat the effects of climate change;
- optimizing the resources used, adopting the best available techniques and promoting the use of renewable sources in order to reduce environmental impacts;
- adopting tools for analyzing casualties, accidents and near-accidents, in order to identify the causes and prevent their recurrence;
- protecting the health of its employees, and third parties who access their offices and construction sites, by maintaining healthy environments and using low-risk products.
- adopting preventive measures to reduce the effects of climate change on the health and safety of workers, including managing risks arising from extreme weather events and unfavourable working conditions.

The ORAT Management recognizes the development of an integrated management system for the Environment and Security as a strategic choice for its business activity; the Direction is involved in the respect of the implementation of these commitments assuring and verifying that the Policy is documented, made operative and kept active also making available the necessary human and instrumental resources, as well as periodically re-examined and spread to all the ORAT personnel, beyond that to the staff of companies operating on behalf of ORAT and to the public.

O.R.A.T. S.R.L.
